

# YAMATO TRANSPORT CO., LTD.

## Japan is a Train-based Society

Public transportation in Japan is highly developed in metropolitan areas and at sightseeing destinations.

A large percentage of people travel by train, so it is common for major stations and trains to be crowded throughout the day.

Very crowded...

## This is why we recommend "Hands-Free Travel"

### Walk around stations with ease

Enjoy comfortable travel in both crowded stations and trains! You will also be relieved from hauling luggage when going up and down stairs, or wandering through large stations.

### Travel safely while holding your children's hands

When both of your hands are busy carrying luggage, it is easy to lose track of your children. This service allows you to travel through crowded stations without worry by freeing your hands so that you can hold your children's hands.

### No more lost luggage

A little carelessness could lead to lost or stolen luggage when traveling through stations you are unaccustomed to. "Hands-Free Travel" ensures a comfortable and safe journey.
